"Circus Rookies"

Meet Two Circus Rookies in Three Rings
Crammed With Fun, Fuss, Feathers

WHOOPEE! The circus is in town! The Big Top! Sawdust—larid lemonade—pale peanuts—steam callopie—elephants 'neverything! And who do you think is with it this season? Karl Dane and George K. Arthur, the funny pair that made the whole world howl in "Rookies!" And what a trail of laughter and disaster they leave! A circus romance—an escaped gorilla—and the greatest aggregation of newer and louder laughs ever presented in one film.

This Week

"Across the Atlantic"

OBITUARY

The death occurred on Tuesday morning, May 5th, of Matthew Chapman, in his 70th year. Deceased had been fairly active until some two months ago when he moved into Champion, where he resided with his daughter, Mrs. H. Higgins, until the time of his death.

Mr. Chapman was born in England but with his parents moved to Plattsville, Ont., while an infant. In 1894 the family moved to Listowel, Ont., where several surviving relatives still reside. He married in 1894, Jane Martin, who survives him.

The deceased and his family moved to Alberta in 1919, settling in the vicinity of Travers where they lived until failing health induced the move to Champion. Quiet and unassuming in character Mr. Chapman still made many friends and was quite widely known where he lived, and his demise will be deeply regretted by all who knew him.

Besides his widow he leaves two sons, James of Reid Hill and Cecil of Travers; four daughters—Mrs. H. Higgins, Champion; Mrs. Frank Nichel, Lomond; Mrs. W. H. Coates, Listowel, Ont., and Mrs. E. R. Donaghy of Lomond. Three brothers and two sisters also survive him. Three brothers, J. W. of Listowel, Ont., Arthur B. of Toronto and John of Keeler, Sask., and two sisters, Mrs. William Roberts of Toronto and Mrs. J. Davis of Brussels also survive him.

The funeral took place on Thursday afternoon from the United Church to the Champion cemetery, Rev. S. R. Hunt conducting the service.

The family have the sympathy of the community in their bereavement.

Anniversary of Union to Be Specially Recognized

Sunday June 10th is the third anniversary of the union of three Canadian churches to form the United Church of Canada. We will observe that historic event in our local evening service by showing how we are experiencing Christian Unity in our own work. Mrs. Aleock, Mr. J. S. Collins and others will take part. Appropriate music will be rendered. Communion service will be observed, with an open invitation to all communicant members of any church and also to those who know Christ but have not entered into church membership, to freely participate in this sacrament of the Lord's Supper.

Deep interest has been shown by many in the planning of this service and a hearty welcome will be extended to all.

Miss Mabel Husted, of Edmonton, is visiting her grandparents, Mr. and Mrs. P. O. Sommers.

W. C. Fry, who has been in this vicinity for some weeks, left for his home at Spokane on Saturday.

G. A. Manhard's residence has just been repainted and decorated with exceptional results as to appearance.

W. I. will meet at Campbell's Hall on Tuesday, June 12th. They are entertaining other branches at this meeting. A full attendance is requested.

B. M. Roberts is the first citizen to recognize the merits of Champion as a summer resort, and his camp in the park is very likely the beginning of a real tourist traffic.

MRS. H. E. JOHNSON DIES IN CALGARY

Just at the time of going to press we learn with deep regret of the death of Mrs. H. E. Johnson in the hospital at Calgary, following an operation on Monday. For a time it was thought she would rally but death came Thursday night. The news will come as a shock to the entire community, so widely and well was Mrs. Johnston known, having been one of the first residents of the district. The family have the sincere sympathy of all in their sad and sudden bereavement.

Thorough Soaking Makes Crop Situation Rosy

Everyone is rejoicing in the splendid rain which began Tuesday evening. The main rain, which lasted some five hours, was followed by a succession of heavy showers and everything is now thoroughly saturated. Any anxiety felt with regard to crop prospects is now thoroughly relieved.

Champion Team Wins Local Tournament

Champion won both games in the local baseball tournament on Monday, defeating Vulcan in the morning by a score of 3-2, with Dewhurst and Walker in the points, and the evening game from Nanton by 12-1. In the first game the fielding by J. McIntyre was an outstanding feature, while in the evening session Siler, in the box, was practically unhittable. There was only a fair attendance, the quality of the ball offered deserving a much larger patronage. The Ladies Aid served refreshments on the grounds.

Champion Will Celebrate Monday, July 2nd

Under the sponsorship of the Champion Elks' Lodge Champion will put on a celebration on Dominion Day, July 2nd. Particulars of the programme, which will be an exceptionally good one will be announced in the next few days.

L. J. Adams wishes to announce that he has the agency for Paints and Products Co., recently organized in Calgary. All stock holders in this company have the right to get Paints at wholesale prices.

A. W. Jopling has on display at the old Beaver Lumber Co. yard a twenty foot Red River Special combine and a twenty eight inch separator, both of which have been attracting a great deal of attention during the week.

Miss Forbes McGillivray was taken to Calgary on Tuesday suffering from appendicitis. After her arrival there it was decided to delay the operation for a time, as she had decidedly improved. Her many school friends will be highly pleased to learn that her condition is satisfactory.

Rules for keeping old age at bay, suggested by the health authorities of Syracuse, include the following: Drink plenty of water at meals and also between meals; look on over-fatigue as your enemy and rest as your friend; take eight hours' sleep a day; exercise your larger muscles regularly every day.

At Auckland, Australia, during a bridge party each player was dealt a complete suit, the situation being discovered by one player laying down his hand. For the benefit of local enthusiasts it might be stated that there is no chance in a million of such a thing occurring.

NOTES AND COMMENT.

The first tax notices to ratepayers in Champion under the new system of including improvements in the assessment have been received. While parcels of land with indifferent improvements or none at all have been lowered the greater the improvements the greater the rise in the amount of taxes to be paid. On the whole, however, the amount levied is nearly double previous levies. The improvements necessitating the increased levy include electric lights on the streets at a cost of \$600.00 annually, \$250.00 yearly for debentures issued to gravel the main street, and the purchase of a carload of lumber and the laying of a sidewalk on the north side of the main street at an estimated cost of \$700.00. Further expense is also anticipated in keeping the main street in first class condition.

While it would be quite possible to point out sections of the town which have been completely ignored in the present estimates and in many previous ones which would have justified an even larger expenditure, there will be a considerable portion of the ratepayers who will think the present program is of a sufficiently optimistic character. Under any conditions it is safe to predict the presence of more than two or three ratepayers at the next annual meeting.

Continuous rains have caused so much serious damage to the fields and early crops in the province of Quebec that His Eminence, Cardinal Rouleau, has instructed all the priests in the diocese to recite every day at the celebration of the mass a special prayer for finer weather. The prayer is a particular one included in the Catholic liturgy to be used at times when weather conditions threaten the crops—News item.

If a transference of the unnecessary train to the south-western portion of Alberta could be included in the supplications two birds might be killed with one stone.

The decision of the Wheat Pool to operate Pool elevators at cost to patrons in order to increase the volume of grain delivered to them would have been largely ineffective during last fall's rush, but in a year of light crops would undoubtedly lead to larger use of these houses. The United Grain Growers originated this movement by a return of a portion of profits to patrons.

The absence of moisture has made this a poor season for road grading as the dirt moved into the roads dries and pulverizes without packing. Continuance of present conditions will undoubtedly limit road programmes.

CHAMPION RESIDENT DIES OF INJURIES

(Calgary Albertan).
Champion, June 4.—Fred Bodwin, who died recently from injuries received in the accident when Dan McRae's car rolled down the Carmargay hill, was a young man who has been

for several years in the employ of McRae. It appears that his friends thought his death was caused by criminal carelessness on the part of McRae, who was driving the car when the accident happened, and he was lodged in jail on the charge of manslaughter. Bail is being sought.

The above from the Alberta of June 4th is so bristling with inaccuracies and casts a reflection on Mr. McRae so far from being justified by the real facts that correction is felt to be a necessity impossible to overlook. The man who was injured is not dead but is making rapid progress towards complete recovery. He was not an employee of Mr. McRae, whose manager is Fred Longdon, and a suggestion of criminal carelessness in connection with the accident is ridiculous with its inference of a desire to rid himself of the man with him, who lives near Carmargay. If there had been an arrest on the charge of manslaughter and bail was denied Mr. McRae would have had little difficulty in securing it, but without a corpse this part of the story would appear to have been manufactured from whole cloth. It is a matter of regret that rumors should get in circulation which would mislead a correspondent of a newspaper into such an awkward and regrettable error.

This spring must have been an excellent one for the propagation of gophers, to judge by the enormous number of young gophers to be seen in every direction along the roads. The old saying, "If an ill wind blows nobody good," would apply in this instance, as there is little doubt the absence of wet weather was very favorable to the gophers.

Local and General

Mr. and Mrs. William Coates of Listowel, Ont., who have been here for the last three weeks visiting Mrs. Coates' father, Matthew Chapman, who was seriously ill but has since recovered, and her sister, Mrs. H. Higgins of Champion, left last week for home. Mr. Coates was very favorably impressed with Alberta and would like to have remained a longer time but farm duties at home hastened his departure.

The wonderful growth made by trees during the past two years is in evidence in every direction and the result is decidedly edifying. The town park has become a thing of beauty and a joy forever during that period, and the authorities who are responsible for it are to be congratulated, particularly as at the time it was undertaken the prospects of success in ornamenting it were far from bright.

The condition of the crops is generally highly satisfactory, although rain is very desirable in every way. Summer following is handicapped to a considerable extent by the dryness of the land and stubbled in crops are beginning to show the effects of the long dry spell in some instances. Local showers have been frequent but with precipitation except over very limited areas.

An idea of the effect of Soviet rule in Russia is available from the fact that fine flour is no longer allowed to be sold to the people, and this in a country formerly one of the largest wheat exporters. Joseph Stalin, head of the communist party attributes this to the pausing of the large estate owners and the rich peasants, who were the large wheat producers.

WEED CONFERENCE TO BE HELD

In connection with the extensive program of weed control and eradication to be conducted during the coming summer, arrangements have been made to hold two-day conferences at a number of points in the Provinces in the next month. These will be held at the four Provincial Schools of Agriculture, at Raymond on June 12 and 13; Claresholm, June 15 and 16;

Olds, June 19 and 20; Vermilion, July 2 and 4 and at the University of Alberta, Edmonton, July 6 and 7.

These conferences will be attended by the Provincial field supervisors, weed inspectors of local improvement districts and councillors, Reeves, secretaries, inspectors and other municipal officials who are interested in coping with the problem of the spread of noxious weeds. The public is cordially invited to attend these free courses at which the approved methods for the control and eradication of weeds will be outlined, in order that the widest possible measure of support may be secured by the Department of Agriculture in the war being waged on these troublesome and costly pests.

TIDAL WAVE HITS JAPANESE FISHING FLEET—100 DROWN

Tokio, May 31.—Newspaper dispatches from Sapporo say that four hundred fishermen are missing and believed drowned in a huge tidal wave which destroyed the fishing fleet of Sarubutu, on the northeast coast of the island of Hokkaido. Official confirmation of the dispatches was lacking.

FALSTEAD IS DERRY WINNER

Epsom Downs, June 6.—Falstead, owned by Sir H. Cunliffe-Owen, won the historic English Derby at Epsom Downs today.

Falstead, in winning the 148th running of the famous English classic, was a rank outsider.

Flamingo was second and Black-watch third.

Nineteen ran.

In winning the classic which was witnessed by a huge crowd, Falstead duplicated the performance of his sire, Spion Kop, which won the Derby in 1920.

Spion Kop also won over a field of 15.

Falstead, which was a 33 to 1 shot, won by a length and a half.

AIRPLANES GO NORTH TO SEEK ITALIA

Oslo, May 31.—With the sealer Hobby steaming north with the first expedition to seek the missing dirigible Italia by air, another vessel was being made ready to carry other airplanes into the north.

The Norwegian government took over the steamer Ingefjord, which is ordinarily engaged in the coal trade at Spitzbergen, to transport one or two navy planes. It is expected she

POOL ELEVATORS TO HANDLE POOL WHEAT ON BASIS OF COST, IS PLAN — PROPOSAL MADE BY DIRECTORS TO POOL DELEGATES IS ADOPTED

Calgary, Alta., May 31.—Wheat pool elevators in Alberta will be operated on a cost basis to patrons. This decision was reached by a full attendance of pool delegates in convention here on Wednesday afternoon.

The new policy laid down will represent something new in co-operative effort in Canada, if not in the world. It means that members will be charged only the bare cost of operating the elevator facilities. When they haul their grain into pool houses, no service or elevator charges will be made. At the end of the fiscal year the actual operating cost will be available and will be deducted from the final wheat pool payment.

Deduct From Final Payments

This change in elevator policy was recommended to the delegates by the directors. The proposal was to eliminate handling and service charges upon delivery of the grain to the pool elevator and deduct the actual operating cost on a per bushel basis from the final wheat pool payment. The new policy decided upon will mean a distribution of pool elevator excess earnings only to those who patronize pool elevators on the following basis: "1" through pool country houses; "2" platform ship-

ments to pool terminals; "3" through line elevators to pool terminals.

The purpose of this new system is to increase the volume of grain passing through pool elevators. C. M. Hall, general manager of the elevator system, in addressing the delegates, strongly urged that pool members use their own facilities to the fullest extent. He pointed out that only by following that policy could the elevator system be able to function with the greatest economy and the full objectives for which the system was built be realized.

300 Line Elevators
This coming harvest the pool would, he said, have close to 300 line elevators in operation and three terminals at the Pacific coast. In order to bring the greatest possible return to pool members with the maximum protection in weights and grades, Mr. Hall suggested that every effort be made to have pool grain handled through pool elevators.

George McIvor, general sales manager, addressed the delegates and pointed out the advantage to the selling agency of having pool grain in pool elevators, readily available to complete sales at any time. He stated that by placing their grain in their own elevators, pool members could assist pool members to get better prices for their grain.

The new policy, it was stated, would be retroactive. The excess earnings of the elevator system during the 1927-28 crop year would be disbursed to the pool members who put their grain through the pool elevators.

It is almost inconceivable that a car so low in price as the "Bigger and Better" Chevrolet should possess so many quality features. The minute you step into the "Bigger and Better" Chevrolet, take the wheel in your hands and step on the starter, you realize that, no matter what the price, you are in a really fine car. For the interior luxury of Chevrolet... its smooth, powerful motor... its quick response to accelerator and brakes... its riding comfort... its up-to-date completeness... all bear out the impression of big-car quality conveyed by the exterior beauty and style of the new Chevrolet Fisher Bodies. When you have looked closely into the deep-rooted, far-reaching quality of the "Bigger and Better" Chevrolet, you will appreciate how ridiculously low are the new Chevrolet prices.

The C.P.A.C. — General Motors' own deferred payment plan stands the most convenient and economical way of buying your Chevrolet on time.

Talk Peace To Have Peace

It is now fully well recognized by students of international relations that one of the causes of war is to be found in the constant predictions of war, in references to "the next war," and surmises as to the varying forms which hostilities will take when nations again take up arms against each other. Those who constantly predict war are, says a college president, "not simply promoters of probable evils, they are actual causes of war, generally among the chief causes." That is, talk war and you have war.

Recognizing the correctness of this view, it is equally true that if the statement, and "saying no" in all countries cultivate the habit of talking peace instead of war, the world will have peace. "The oftener world peace is discussed among serious minded men and women," says a United States paper, "the better the prospect that war can be at last conquered," and it adds that the more intelligent leaders of democracy the world over can be brought together to consider steps for peace. As they gather from time to time at Geneva, the brighter becomes the prospect that ultimately—perhaps sooner than most of us now believe—war will be abolished.

War after all is largely a state of mind. Let the people of any community or country begin to take a pessimistic view of things and constantly harp upon business and industry hard times, and it is inevitable that depression and hard times will come. Equally true is it that when people talk property and adopt an optimistic tone, a revival in business and industrial activity follows. If, instead of thinking of "the next war" and talking war, people think and talk peace, then peace rather than war will prevail.

It has been reported that the Supreme Court of the United States has settled one hundred disputes between States, and in Canada our Supreme Court and the Judicial Committee of the Privy Council have settled numerous disputes between Provinces and between Provinces and Dominion. Why should not disputes between nations be settled in a like sensible way? There is quite as much justification for two States or two Provinces to declare war and fly at each other's throats as there is for two nations to take such insane action.

War is a stupid business. It settles no issues. It comes about from a little group of men who get into a quarrel with another little group. The law does not allow individuals to murder each other because they have a quarrel, and international law should, in like manner, outlaw war as a means of settling disputes between nations. There is no evidence that the leaders in these countries have not sufficient intelligence or sufficient patience to find a way out, so they select the finest men on both sides and set them pounding each other into the mud and blood and blowing each other to bits. The side that can stand this longer is the wiser and gets its own way. So far no reason emerges in the settlement.

Sir Esme Howard, British Ambassador at Washington, in a recent address said: "It can be proved to a man that if his country goes to war for any issue short of its absolute liberty of action at home, and in defence of that liberty, he will in future stand a very good chance of being bonked in his home; if we can show him that even though his country may be victorious, he will certainly have lost his money increased by 200, 300, 400 or 500 per cent; if we can make it clear to him that for the sake of some issue to which he is probably an entire stranger he risks having to give up that very North Ford next month, or even worse, that he may very probably be thrown out of work, as has been the fate of millions in Europe after the last war; then perhaps he may find war less pleasingly dramatic and may begin to think that as a means of settling disputes between nations, it is better abandoned. So far as statecraft is concerned, the fear of war is the beginning of wisdom."

Some people may be inclined to doubt the value of Peace Talks, Disarmament Conferences, and treaties between nations outlawing war, but the fact is there are all factors in educating people and helping to create and develop a peace consciousness in all countries. And, let it be repeated and emphasized, the creation of such a consciousness is the strongest of all guarantees for the maintenance of peace.

Due To Irrigation

There are now eight irrigation projects in Southern Alberta covering a total acreage of 400,000, of which 138,800 acres are irrigable. One of the projects, the Lethbridge Northern Irrigation District, reports having doubled its irrigated area within the past two years, trebled its production and increased its population two and a half times.

Medical Aid Caravan

A medical aid caravan will circulate through Northern Alberta, this year. It has been sent out by the provincial department of health and is in charge of Dr. L. T. Washburn, superintendent of the University of Alberta hospital.

The bean can by the latest motor beacon is estimated at 500,000, 600 candlepower.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is an acid neutralizer, the alkaline fruit salts instantly. And the best alkaline known to medical science is Phillips' Milk of Magnesia. It has maintained the standard with physicians in the 50 years since its first use. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude materials, and you will learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acid. Each bottle contains full directions—any druggist.

Tribute To British Flag

Union Jack Made Union Flag Post-haste Says South African

A great tribute has just been paid to the Union Jack, and satisfactorily enough from that country in which there has been some commotion about it—South Africa. A press despatch from there says that native opposition to this flag was effectively demonstrated at a General Council of the Transkeian Territories which might be described as a native Parliament, when the Council unanimously passed a resolution that the Government be requested to permit the Union Jack to be flown with the Union of South Africa flag on all Magistrates' offices in the native territories. A councillor asked the members not to discard their old friend the Union Jack, which had freed them from slavery and which was the only flag they knew the did not object to the Union Flag, but pointed out that were it not for the Union Jack there would be no Union Flag. We might also venture to say that were it not for the Union Jack there would be no Canada as there is today.

FIGHTING FOR BABY'S HEALTH

Is the Constant Care Of Every Young Mother

The young mother has a constant care in looking after the health of her little ones. Childhood ailments come on so sudden—sometimes without a minute's warning—the mother may have a very sick baby on her hands. She needs a sure cure. That is unless she has a remedy in the baby for any of the common ailments of babyhood and childhood.

Such a remedy is Baby's Own Tablets. Thousands of mothers around the world have found a box of the Tablets on hand and they proclaim them to be without an equal in treating baby's ailments; regulating his bowels, and thus driving out the cause of colic, colds and simple fevers, and making the baby feel better.

Baby's Own Tablets are an absolutely safe remedy. They are guaranteed to be free from opiates or any other narcotic drug which are so apt to be sent for by the mother. Mothers, if you value the life of your little ones give him Baby's Own Tablets when he is ill, or better still, give him one occasional dose of the Tablets to keep him healthy. Tablets are sold by medicine dealers and will be sent to you by mail. A box of 25 cents a box by addressing The Williams' Medicine Co., Brockville, Ont.

Tractors On The Farm

Western Farmers Investing More Heavily In Motors For Heavy

There are in Alberta today 71,932 farmers who have 831,224 horses in use, and 10,225 tractors. In Saskatchewan there are 141,400 horses and 11,939,660 horses, and 24,367 tractors. Manitoba has 51,200 horses and 266,600 horses, and 24,367 tractors. The survey would indicate that while the horse is yet far from being a back number on Western Canadian farms, the day of the tractor has definitely arrived.

Spare the children from suffering from worms by using Miller's Worming, a most effective vermifuge with which comes these indications of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

Parachute Lands Plane Safely

Invention of California Man Proves Feasible In Test

A small biplane has been landed safely from 2,000 feet by means of a huge parachute, without injury to the pilot or damage to the plane. The experiment, performed privately at Key, Cal., was designed to prove the possibility of using a parachute for disabled planes to land safely. The plane, a Jenny biplane, piloted by E. J. McKee, was used in the test. The plane dropped about 2,000 feet with its motor idle, when the huge parachute, opened out. McKee staggered with the ship as it speed rapidly slackened. He said he felt only a slight jar when the plane landed and the folds of the parachute enveloped him. The biplane was not damaged except for a minor bend in the tail.

The parachute is the invention of Charles Roderick, San Francisco, with numerous other armies, excepted, complete satisfaction was the result of the experiment.

Special delivery stamps are manufactured for 16 cents per thousand.

A reliable anti-grip—Minard's.

Progress Has Been Made

Sending Messages By Beam System

What beam wireless had done for long-distance communication was explained by J. H. Thompson, chief engineer of the Marconi Wireless Company, to the members of the Montreal branch of the Engineering Institute of Canada, recently. Using slides, the speaker produced a graphic picture showing a telegraph operator at Drummondville, Quebec, using an instrument resembling an ordinary typewriter and sending messages at the rate of 150 words to the limit will be received almost instantly by an operator at Dorchester, England.

Mr. Thompson illustrated the progress made in wireless transmission by showing the crude instruments used in the early days of wireless. He pointed out that the equipment of stations used 15 years ago is of no use today. The beam system itself, he said, was the result of experiments by which all the energy available at the sending station was successfully sent in one direction thus establishing a beam of energy.

Seed Growing In B.C.

Industry On Vancouver Island Rapidly Increasing In Importance

Seed growing is one of the latest industries of Vancouver Island of rapidly increasing importance. Vancouver Island sweet pea seed rears on the English market from three to four shillings per pound more than the California seed. The largest sweet pea seed firm is at Duncan, which produces yearly about two tons. From 15 to 20 women are employed each year to pick, clean and pack the seed whose excellence and high quality is becoming world-famous.

When Holloway's Corn Remover is applied to a corn it is rubbed out and the callosities come out without injury to the flesh.

B.C. Grows Bermuda Onions

Bermuda onions have been successfully introduced into British Columbia, and will be grown for the early markets from sets imported from the Southern States. Last year eighteen acres were planted at Kelowna in an experimental way with satisfactory results. The onions cured well and yielded eight tons per acre. The acreage has been greatly increased this year. The crop should move to market about July 1.

Some men are sentenced to hard labor for life and some do it of their own accord in order to make ends meet.

ECZEMA RASH ON HANDS
Troubled For Three Years.
Healed by Cuticura.

"I was troubled with eczema on my hands for three years. It appeared in a rash and then formed blisters. It troubled me much worse when I could hardly get my hands in water or be near heat. My hands were terribly inflamed and disfigured. I had to wear old gloves all the time."

"I now use Cuticura Soap and Ointment. I feel better than I have in years. I bought more and after I had used it three months I was cured. (Signed) Miss Beatrice Allen, Highgate, Mass."

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

Prepared by W. L. Mumford, New York, N. Y. Sold Everywhere. Cuticura Soap Co., New York, N. Y.

OCEAN STEAMSHIP SERVICE

White Star Line Paying Particular Attention To the Canadian Trade

The importance of the Canadian route was a point strongly emphasized by Lord Kylesant at the annual meeting of the White Star Line held in London, Eng., on May 18th, according to cable dispatches to the White Star Line in Montreal. Lord Kylesant, chairman of the Board of Directors, and an outstanding figure in world shipping, recalled the days of 1871, when the S.S. Oceanic inaugurated the White Star Line Steamship Service across the Atlantic, and from that date he traced, by progressive steps, the development of the company.

The shareholders of the company now number about 15,000, he said, and after providing for the depreciation of the fleet, and paying the dividend on the preference shares, he recommended a dividend of six per cent on ordinary shares and the balance carried forward.

"There was," he said, "a slight increase in the number of passengers traveling and from the United States of which we secured a large number, and from this point he went on to state that we have, for some time past, been giving most careful consideration to the important question of the construction of a new express mail vessel so that we may continue to maintain the position and traditions of the White Star Line in the North Atlantic trade."

Lord Kylesant announced that the company has under construction at Belfast a "passenger motor vessel of over 26,000 tons which we expect to put into commission in the 1920 season. She will be not only the largest passenger ship engaged in the New York-Liverpool route, but also the fastest passenger vessel yet to be placed in that service."

"We have," he continued, "given particular progress toward the realization of the Canadian traffic. In addition to our regular service from Liverpool to Quebec and Montreal, in the near future we will place the new liner, we have established a service from London, Havre and Southampton to Quebec and Montreal, so as to cater more especially to south of England and continental passengers traveling to and from Canadian ports in this service."

"From Channel ports we have placed the Atlantic and the Megantic, the former vessel being the largest ship to Montreal."

After mentioning that the White Star Line have transformed the Atlantic, 24,500 tons into a cabin steamer, thereby having the largest cabin steamer in the world, Lord Kylesant dwelt on the importance of the tourist and cabin trade. In effect, he said, that this accommodation has enabled many with the desire to travel in style, who previously had not been able to gratify their wishes, to realize their ambitions.

"The White Star Line," he continued, "is carrying a larger share of this class of travel than any other company. Passengers in this tourist service are assured comfort and good catering combined with exceptionally low rate passage money for the return voyage."

In dealing with the emigration question, Lord Kylesant said that "shipping companies engaged in trans-Atlantic trade used to carry large numbers of emigrants from Great Britain and Ireland and other countries in Europe, but the United States immigration restrictions have reduced this traffic to comparatively small proportions."

"The Dominion of Canada has imposed regulations upon immigration from the continent. The flow of emigrant traffic across the Atlantic has thus much curtailed, and the valuable source of revenue for vessels adapted to carry large numbers of emigrants has been greatly diminished. As we hope that the new restrictions may be considerably modified, at least in favor of settlers of British stock."

Mr. Derek Oldham, the English actor, is telling a good story against himself. One day recently he was stuck in a traffic block and was sitting in his car practicing singing scales. He did not realize that the vibrations from the car were down, and he suddenly became aware that a taxi-driver was looking at him in a queer way. Turning to Mr. Oldham's chauffeur, the taxi-driver shouted out: "Larnie, I thought summat 'ad gone wrong with yer exhaust!'"

A man could learn a great many things if he didn't think that he already knew them.

For Hay Fever—use Minard's.

The average man prices himself on the possession his neighbors can afford.

WOULD AMEND THE DOMINION ELECTIONS ACT

Ottawa.—Parliament will address itself next session to the amending of the Dominion Elections Act if the report of the committee on privileges and elections is adopted by the House of Commons.

The committee, under the chairmanship of J. J. Denis, Liberal, Joliet, considered their report, the fruit of several weeks of investigation into the Athabasca elections of 1925, where an inquiry by Mr. Justice Clarke, of Edmonton, established that corrupt and illegal practices had taken place.

The committee will recommend to the House that since the report of Mr. Justice Clarke discloses that the cause of the corrupt practices in Athabasca was due to the partisanship, ignorance and incompetency of certain election officials, the auditor-general should submit to the Department of Justice a full statement of the payments made to the aforesaid officials with a view to instituting proceedings for the recovery of the amounts so paid to such officials, if the law provides for such action.

It is also recommended that a special parliamentary committee be appointed next session to examine the evidence and deliberations of the present committee on privileges and elections, to study the Dominion Elections Act and to give special attention to the method of selecting returning officers and the preparation of voters' lists.

Further, it is urged that the chief electoral officer should recommend to the proper authorities the steps to be taken against all violators of the Dominion Elections Act.

Civil Aviation In Italy

Development Is Rapid and Country Holds Third Place In World
Rome, Italy.—Italy now ranks as the third country in the world for civil aviation. It comes immediately after Germany and France, in that order given, and is ahead of England, which occupies fourth place.

By the end of 1925 Italian air routes will total 2,915 miles which daily passenger service in office aviation will be effected. The whole field of civil aviation, under Secretary for Air, has been developing at such amazing speed that many miles already have been added to the total number of air routes.

Vote Sum For League

Ottawa.—The House passed a vote of \$150,000 for Canada's contribution to the League of Nations. Hugh Guthrie brought up the question of German currency held by the Canadians, which had been repudiated by the German Government. The Prime Minister pointed out that before the Government could do anything in such a case it would have to consider the whole question of speculation, which was very difficult indeed.

To Aid Mental Hygiene Research
Toronto.—The Laura Spelman Rockefeller Memorial, founded by John D. Rockefeller, has announced its intention to assist mental hygiene research in Canada by the grant to the Canadian National Committee for Mental Hygiene of \$150,000, to be spent during the next five years. This is conditional upon the raising from Canadian sources of an additional \$250,000 during the same period.

Rumor Is Denied
Winnipeg.—Rumors in circulation to the effect that he had been dropped from the presidency of the University of Alberta were denied by Hon. John Bracken, premier of Manitoba. "The rumor are without foundation," he declared.

Complain About Expenses
Ottawa.—Complaints of Canada House were heard in the House when a vote of \$70,000 for contingencies and \$20,000 for salaries for the high commissioner's office in London were under discussion. After considerable debate, the item carried.

Turko-Italian Treaty
Rome.—Premier Mussolini and the Turkish Minister Said Bey, have signed a five year bilateral treaty binding Italy and Turkey to neutrality, armistice and conciliation.

Tornado Near Kansas City
Kansas City, Mo.—A tornado struck Englewood, a suburb between here and Independence, Mo., on Tuesday street cars were reported wrecked. Ambulances were sent to the scene.

Operate On Cost Basis

Alberta Wheat Pool Elevators Adopt New Policy

Calgary.—Wheat Pool elevators in Alberta will be operated on a cost basis to patrons. This decision was reached by a full attendance of Pool delegates in convention here.

The new policy laid down will represent something new in co-operative effort in Canada, if not in the world. It means that the members will be charged only the bare cost of operating elevator facilities.

When they haul their grain into Pool houses no service or elevator charges will be made. At the end of the fiscal year the actual operating cost will be available and will be deducted from the final Wheat Pool payment.

This change in elevator policy was recommended to the delegates by the directors. The proposal was to eliminate handling and service charges upon delivery of the grain to the Pool elevator and a per-bushel basis from the final Wheat Pool payment.

Would Provide Work For Ex-Service Men

Resolution Favors This As Best Memorial To Earl Haig

London.—The ex-service men at the British Legion conference passed a resolution to the effect that the best tribute that could be paid to Earl Haig would be providing work for ex-service men.

Lady Haig was present and said this would have met with the approval of her husband, whose desire would have been to provide work for ex-service men.

It is understood that the resolution adopted by the Legion members was not intended to depreciate the idea of a national memorial to the late Field Marshal, which the Government is now considering.

British ex-service men will attend the conference of ex-service men at the conference of ex-service men, to be held at Luxembourg next September.

Inspection Satisfactory

Objection To Examination Of Immigrants By Canadian Doctors Unwarranted

Toronto.—"We have examined every single objection that has been raised against the examination of immigrants by Canadian doctors of assisted passage immigrants and we have found none of them well founded," declared Dr. David Clark, Assistant Deputy Minister of the Department of Natural Health, in an interview.

Articles appearing in certain sections of the British press against the policy of having Canadian doctors examine immigrants, he said, were full of inaccuracies, he declared. "The causes of a decrease in immigration to Canada this year," he said, "are not the examination of immigrants by Canadian doctors, but the medical inspection policy. One of the causes for the decrease of immigration from Britain, he said, was the feeling of increasing optimism there."

Replace Provincial Police

R.C.M.P. Have Taken Over Work of Saskatchewan Force

Saskatoon, Sask.—The Saskatchewan Provincial police force passes into the pages of history of the northwest, their activities being taken over by the Royal Canadian Mounted Police, the Saskatchewan sub-division being under the direction of Inspector John Kelly, who transfers from the disbanded force to the "scarlet riders." Some other members of the S.P.P. will join the R.C.M.P., while the following members of the latter force, located at the Saskatoon detachment for some time, will carry on: Sgt. C. E. Drysdale, Detective Sgt. C. E. Hibbard, and Constables T. Theriault and P. W. English. The first two have a long service record in the force, dating back to the old Northwest Mounted days.

Inquiry Is Ordered

Ottawa.—The parliamentary immigration inquiry has approved a motion for a return showing all special immigration permits issued from January 1, 1920. The report will show the number of permits, officially termed letters of admission or assurance granted to members of parliament and others.

Appoint Conciliation Board

Ottawa.—A conciliation board has been appointed to investigate the carpenter's strike in Calgary. Mr. Justice Clarke will be chairman. James H. Gordon will represent the employers, Robert Hewitt, the men. The men are asking for an increase of 12½ cents an hour.

U.S. Honors War Dead

Thousands Attend Memorial Service At Arlington Cemetery, Washington

Washington.—The White Crossed rolling hills of Arlington beckoned thousands of citizens, soldiers and sailors of the national capital for the annual memorial service, May 30, at the graves of the fallen heroes of all wars.

For the first time since he entered the White House, President Coolidge presided at the memorial service. He was seated at the head of the main aisle near the tomb where Abraham Lincoln made his immortal address in Gettysburg, Penn.

Practically the entire day was set aside for services arranged by patriotic and veterans organizations. A feature was a parade of veterans of all wars through the downtown streets and over to Arlington.

Sir Keme Howard, British Ambassador, and Hon. Vincent Massey, Canadian minister, took part in the exercises. The graves of the fallen were decorated by the graves and the Cross of Sacrifice erected by the Canadian Government in honor of Americans who died while serving as members of the Canadian corps.

POOR SALARIES PAID SCIENTIFIC AGRICULTURISTS

Ottawa.—A motion to go into supply in the House of Commons prompted C. G. Cooke U.F.A., Maskeed, to protest the salaries paid to the scientific and technical positions of the department of agriculture were inadequate.

Mr. Cooke declared that the department of agriculture was losing the professional men because of the low salaries which were paid. He gave a comparison between salaries paid in the United States service and in the Canadian to illustrate the fact that Canada paid much less than the U.S.

The professional service of Canada said Mr. Cooke, must compete with that of the U.S. for men. As things stood many Canadians went to the U.S. to take post-graduate university courses. Frequently they remained there because of the fact they could obtain more money in that country.

Mr. Cooke compared salaries paid in the cereal division of agriculture with those paid in the geological survey. The figures he quoted showed that the salaries in the cereal division were lower. Canada could not afford to lose her scientific agricultural men, he declared. Agriculture was Canada's basic industry and wheat growing was the most important phase of that industry.

J. B. Steedman, Liberal-Progressive, said, declared the position of the salaries paid to scientific agricultural men was one of the most important matters which had come before the house this session. It should be realized that the prosperity of Canada depended largely on her agriculture, yet the ravages of disease were spreading in certain quarters of agricultural Canada, and it was of prime importance to the Dominion as a whole that adequate salaries be paid our scientific agricultural officials so that their research efforts could be used for the benefit of agriculture in this country.

Noted Doctor Is Latest Victim Of Scientific Fraud

London.—News was received here of the death of Dr. William Alexander Young, director of the Gold Coast Colony, Africa. Dr. Young was a well-known man, who had come to the notice of the public as a result of his researches into the origin of that disease.

It is believed here that Dr. Young contracted the disease in the course of his researches with Negri. Young was of Scotch descent and had a long experience with tropical diseases. In 1924 at the comparative early age of 38 he was appointed to his present position.

Plane Service Cuts Two Days

Pilot J. H. St. Martin accepts the first shipments of parcels by the new Canadian Pacific air-express service. He-Wehsky in which the planes are met, the Toronto, Ottawa, Montreal and Winnipeg, where the late steamers are met, the new service cuts two days off the regular schedule. Domestic traffic between the cities mentioned is also accommodated to time-saving advantage.

May Receive Appointment

At Arlington Cemetery, Washington

Washington.—The White Crossed rolling hills of Arlington beckoned thousands of citizens, soldiers and sailors of the national capital for the annual memorial service, May 30, at the graves of the fallen heroes of all wars.

For the first time since he entered the White House, President Coolidge presided at the memorial service. He was seated at the head of the main aisle near the tomb where Abraham Lincoln made his immortal address in Gettysburg, Penn.

Practically the entire day was set aside for services arranged by patriotic and veterans organizations. A feature was a parade of veterans of all wars through the downtown streets and over to Arlington.

Sir Keme Howard, British Ambassador, and Hon. Vincent Massey, Canadian minister, took part in the exercises. The graves of the fallen were decorated by the graves and the Cross of Sacrifice erected by the Canadian Government in honor of Americans who died while serving as members of the Canadian corps.

Bill Defeated In Senate

Government Measure To Amend Naturalization Act Thrown Out In Upper House

Ottawa.—The Government bill to amend the naturalization act was killed in the Senate.

The bill would have placed authority for the granting of naturalization certificates in the hands of the secretary of state without its being necessary for the applicant to make prior application to court, as now required.

The bill met stormy opposition in the Senate. It was discussed at some length by the Senate secretary in committee of the whole. Eventually Senator Laird moved that the committee rise. This was carried by 28 to 28. The effect was to kill the bill.

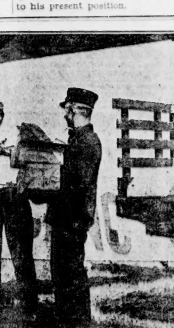

Senator Chamberlain, Government leader, explained the measure, which he said would simplify procedure and prevent abuses. The senate department and a well-trained staff to handle the work. Experience had shown that court inquiries on naturalization were absolutely useless.

A Martyr To Science

Noted Doctor Is Latest Victim Of Scientific Fraud

London.—News was received here of the death of Dr. William Alexander Young, director of the Gold Coast Colony, Africa. Dr. Young was a well-known man, who had come to the notice of the public as a result of his researches into the origin of that disease.

It is believed here that Dr. Young contracted the disease in the course of his researches with Negri. Young was of Scotch descent and had a long experience with tropical diseases. In 1924 at the comparative early age of 38 he was appointed to his present position.

Plane Service Cuts Two Days

Pilot J. H. St. Martin accepts the first shipments of parcels by the new Canadian Pacific air-express service. He-Wehsky in which the planes are met, the Toronto, Ottawa, Montreal and Winnipeg, where the late steamers are met, the new service cuts two days off the regular schedule. Domestic traffic between the cities mentioned is also accommodated to time-saving advantage.

Record During March For Canadian Roads

Railways Carry More Freight Than In Any Previous March

Ottawa.—The Canadian railways carried more freight during March 1926, than in any previous March. Gross revenues also were the largest carried in March, exceeding those of March, last year, by \$2,155,479, or 53 per cent. Although operating expenses were heavier than in 1927 by \$1,252,220, or 3.0 per cent, net revenues were larger by \$83,259.

The large carry-over of grain has been an important factor in the heavy traffic and earnings of the railways during the first quarter of 1926, the movement of grain to the Pacific ports being particularly heavy. The March payroll was heavier than in 1927 by \$1,037,333, and the average number of employees increased by 2,622.

The Canadian National Railway increase in gross revenue, compared with March 1927, was \$704,771, or 45 per cent, for an increase in freight of four per cent, and a decrease in passenger traffic of 6.3 per cent.

The Canadian Pacific Railway gross returns for March were heavier than 1927 by \$1,331,318, or 8.8 per cent. Passenger and express revenues showed decreases but all other accounts were larger, freight by 125 per cent.

Has a New Mission

Premier Requested To Arrange For Necessary Relief To Ensure Good Crops

Ottawa.—Premier King has a new mission. The latest request is that he should appoint himself rain-maker extraordinary to Saskatchewan.

"We have had a wonderful seeding time and everything is now in the ground in good shape," runs a letter from Senator Saskatchewan, which Senator Laird read in the Senate recently. "I wish you would read the attention of the Prime Minister to the desirability of arranging for a copious supply of rain each week for the next three weeks, and we will guarantee to do nothing to prevent it." Western Canada has ever produced."

Ontario Joins Manitoba

In Legal Fight With Federal Government Over Regulation Of Securities

Toronto.—Announcement has been made by Hon. W. H. Price, Attorney-General of Ontario, that the province is joining with the province of Manitoba in the latter's legal fight with the Dominion Government over the question of certain rights in connection with the regulation of securities.

Edwin Bayly, K.C., Deputy Attorney-General of Ontario, will have for England June 15, and will appear with Hon. W. H. Craig, K.C., counsel for Manitoba in the case as heard by the Privy Council early in July.

COOLIDGE MAKES STRONG PLEA FOR WORLD PEACE

Gettysburg, Pa.—In the first speech to be delivered by a president on the Gettysburg battle field since Lincoln's immortal address, President Coolidge, in connection with the Memorial Day exercises, voiced a plea for the abatement of war as the fittest tribute to the war dead of America.

At the same time he demanded less indifference to crime in the U.S. and condemned what was described as a tendency of the legislators to exceed the powers granted to them by the constitution. These things, he said, tended to weaken the regime of law and to breed turbulent populations, prone to war.

Declaring the "one thing we want above all else for ourselves and for other nations is a continuation of peace," Mr. Coolidge reviewed negotiations by the state department for treaty and against war and for arbitration treaties.

The Brandt proposal that the United States and France sign a treaty to regulate war was described by the President as having developed into "one of the most impressive memoranda that the world has ever seen."

"It is my earnest hope that success may crown the negotiations now in progress and that the ideal which has inspired the French minister of foreign affairs and the secretary of state of the U.S. in their joint efforts to find a solution of the problem of peace, may find a solution of the problem of peace."

Inmate Of Canadian Prisons
Ottawa.—Canadian penitentiaries have at present a total of 2,580 inmates. Of this number, 2,530 are men, and 50 are women. Canadian born number 1,614, and in all 48 nations are represented. This information was given and the statistics were read by Senator J. P. B. Cullen.

Against Fast Time
Vancouver.—Vancouver residents will continue for the remainder of this year to work and play on a time basis, by a vote of more than four to one the citizens today voted against adoption of daylight saving time for the summer months.

Germany has a shortage of skilled labor.

FLAG QUESTION CAUSE OF RIOTING AT CAPETOWN

Capetown, South Africa.—Intense feeling of police from all parts of the peninsula were drafted into Capetown to cope with the threatening situation which developed when a demonstration, said to have been inspired by unrest among colored workers, ran counter to the celebration of the 18th anniversary of the establishment of the Union of South Africa.

The celebration was historic because for the first time the new national flag was flown along with the Union Jack, and Premier J. H. M. Hertzog and General Jan Christian Smuts, former premier and present leader of the opposition, appeared on the same platform and delivered speeches.

Scenes witnessed were reminiscent when excited crowds filled the streets and several injuries occurred. Colored people were present at the demonstrations and automobiles carrying miniatures of the New Union flag were partially wrecked, but vehicles which carried miniatures of the Union Jack were not touched.

The police were forced to charge the mobs several times. A dozen police and a large number of colored people were injured, 60 persons were arrested.

In his address at the celebration Premier Hertzog said the new flag was a "lasting symbol of the independence of the power and authority of the South African nations."

Referring to the flying of the new Union flag alongside the Union Jack, General Smuts declared the two emblems entwined symbolized the equality of the races and the indivisible brotherhood which had flowered out of the conflicts and struggles of the past.

Stops Operations Of Bogus Stock Salesmen

Ontario Government Has Put Money

Toronto.—More than one hundred brokers, of doubtful repute, and high pressure security salesmen have been put out of business recently as the result of the clean-up campaign inaugurated by the Ontario Attorney-General. The Department of the Security Fraud Prevention Act was put into force recently.

According to the department none of the offenders have been jailed, others are out on bail pending appeal and a majority have been deported to the United States, from whence they came.

Receive Degrees At McGill

Honorary Degree Conferred On Five

Montreal.—The honorary degree of Doctor of Laws was conferred on five distinguished Canadians at the 1028 convocation of McGill University.

The recipients were: Sir Wilfrid Grenfell, famous Labrador mission-ary; Canon Cody, Toronto; William Bell Blair, director of the New York Zoological Park and a graduate of McGill; George Isidor, writer, and Julian C. Smith, banker.

Sir Arthur Currie, principal, had not sufficiently recovered from his recent illness to be present.

Princes Plan African Trip
London.—The Prince of Wales, who plans a tour of Africa next autumn, will be accompanied by the Duke of Gloucester (Prince Henry), and the Duke of Kent, who will be absent for four or five months. The date for the departure has not been set, but it is their aim, after visiting Mombasa, Kampala, Uganda, Tanganyika, and Rhodesia, to spend Christmas in Capetown.

CHAMPION CHATTER

VOL. I

Thursday, June 7, 1928

No. 17

Published in the interests of the People of Champion and Farmers of the vicinity.
GEO. L. DUPUE, Editor.

EDITORIAL
A friend of ours asked us the other day why we advertise, and we answered him this way:—We regard our advertising as part of our service to the people of this community. If we expect to do business with you, you are entitled to the news of our business, and we would be remiss in our service to you if we did not advertise.

Our heartfelt sympathy goes out to Mrs. Chapman and family in their bereavement.

Men Liked
She: "How much do you earn my dear?"
He: "About \$100 a year."
She: "But we can't live on that." He: "Oh but I get paid \$4000."

"Oh Boy," said it a grand and glorious feat.

"Good Equipment Makes a Good Farmer Better"

Local and General

K. R. McLean R. O. Sight Specialist, 212 Herald Bldg., Calgary, will make his monthly professional visit to Champion, at the Drug Store, Friday, June 29th.

Thirty-three deaths and property losses totalling \$2,328,777.72 resulted from fires in Alberta during the year 1927, according to the recently issued report of Henry Bruce, provincial fire commissioner. Fire waste from the burning of dwellings, stores, barns and garages amounted to over \$1,500,000, or 65 per cent. of the total fire losses for the year, and it is pointed out in the report that practically all of these fires were due to carelessness in some form or other. During 1927 a total of 730 cities, towns and villages in the Province were visited and inspected by officials of the fire commissioner's office and 687 orders were issued for the correction of defects. Convictions under the Fire Prevention Act during the year totalled 36, or 94.7 per cent. of those brought to trial.

Champion has always provided a fair proportion of tourists during the holiday season but this year, to judge by the number of trips one hears of as planned all previous records will be shattered. Almost everyone has a trip of some kind in view, some to far away points and others to attractive points nearer home. The automobile will naturally be almost the sole means of transportation, and this fact indicates what tremendous strides have been made in the pleasure of living since the introduction of this vehicle. From the plaything of the rich it has become almost a necessity on every farm and the modern car is a luxurious contrast to the horse drawn vehicles of the near past, to say nothing of the possible speed made available, exceeding any but the fastest trains. While statisticians and good roads advocates always figure solely the expenses of outside tourists coming to this country, the traffic from here to other parts of the continent would very likely afford surprising figures if they were tabulated.

KNOWING how is half the shoe repairing battle but only half. The other fifty per cent is having the proper electric machinery and the best of leather. We're here to repair your shoes comfortably and fashionably. Mail your specialty. We pay return charges.

in" when it rains like that.

It's an affair when a college student fails to turn in the test and no turns home with nothing to show for the money expended but an education.

Styie Hunt
The stout ladies have changed a famous quotation. They say—"There's a destiny that ends our shapes."

We have unloaded one of Mc-De's Harvesters. Look them over—you'll like. They pay for themselves on 100 to 200 acres.

Mc-De's Blading Twine looks right, does it? kink or snarl and all of the twine will run out

without tangling. Try that on your binder.

One advantage of being only six years old—when she lets you you can cure your broken heart by throwing rocks at her.

The common sense thing to do is to loost for your home town and community.

Americans hate to take orders. The only way to stop some of them from drinking is to make drinking compulsory.

Champion is sure going to put on a big day on July 2nd. Baseball, races, bucking, foot races, carnival, fireworks, dancing, golfing and tennis etc.

HOUSE PLANTS
Four Flowering Plants.....1.00
Six Plants, foliage and flow-
ering.....1.00
W window Boxes......75
Hanging Basket......75
Special Prize for the best kept yard in town.

The Helping Hands and Excelsior C.G.I.T. groups participated in a hike on the 1st of June. They Walked by way of track, up to Mrs. G. Dow's. On the way there, ants-nests which were found were looked at. A birds nest was also found with two different kinds of eggs in it, so that it was argued about. When Mrs. Dow's house was reached the campfire was built. Weiners were then roasted, put in buns, and joyfully eaten. Mrs. Dow then made an appearance with a large kettle full of cocoa, which tasted very good after the long walk. A story was next told and games played after which marshmallows which Mrs. Dow supplied were toasted and chocolates eaten. Everyone started for home in high spirits and on the way back to town songs were sung and games played. Upon reaching town

Champion Meat Market

the girls dispersed on their ways home after singing 'Taps'. From the way the girls talked about the hike, they must all have greatly enjoyed themselves and wish to thank Mrs. Dow for her kindness.

Champion Juniors Lose To Vulcan—Basketball

A second time the Champion juniors met defeat at the hands of the Vulcan players. The score was 6-10 against 7-13 of the previous game. A distinctly better grade of basketball was shown in the second struggle where, as referee, Miss Bond tried conscientiously to check on the too frequent personal fouling committed by both teams. Rhea Higgins as guard proved on the alert; she has the knack of appearing in the right place at the right moment. At times her passes were made rather wildly but her playing on the whole showed promise. Helen Holm, who supported her as guard was often unable to check the quick play of Vulcan's star forward. Once in position, however, Helen has a system of checking hard to break through. Ena Gill as centre and Ruby Alder

BEAUTY PARLOR

Mrs. J. Archibald will be in attendance every Friday and Saturday and on special occasions.

as forward, towards the end of the game, both had a tendency to stand in somewhat helpless looking inactivity whenever their opponents were in possession of the ball. Aileen McCullough, the second forward was closely guarded, and on the few occasions when she had a clean get-away, she did not score as well as she usually does.

Since their training is to be measured in weeks, one cannot reasonably expect great technical skill from the juniors. So far they have shown themselves good losers; they ought soon to become good winners and justify the urge in the high school yell to, "Get right in it! Play and win it!"

Would You buy the same make of car Again?

Over 87% of all McLaughlin-Buick owners answer "yes"—a greater degree of owner loyalty than any other leading make of car can claim . .

Owners know car values!

Drive a McLaughlin-Buick and learn the fullest measure of motor-car satisfaction.

Your Best Insurance Policy

Why carry fire insurance and allow the sun, wind and rain to wreck your homes?

Homes well kept and painted are unmistakable signs of thrift and good management.

Sherwin-Williams Paints

stand between your homes and the ravages of weather.

SWP on a can means quality, uniform color and years of experience in Paint manufacture.

Cheap paint is dear even as a gift if it fails to give you the desired results, and results are only proven over a period of years.

Our Paint Service and Knowledge of Application is always freely given. This is also important as the best paint improperly mixed and applied will not stand up.

We have a wonderful stock of Paint. Our lines are exclusive and specially made for certain uses.

We are not here to merely sell you Paint, but to see that you get a good job done.

W. C. HOSKINS

Five Reasons

Why Wheat Producers Should Support

The Wheat Pool

1. Because your self-protection as a producer is incomplete and ineffective if private organizations can still exploit you by manipulating prices against you.
2. Because co-operation helps to uphold the standard of living by suppressing the element of profiteering in the grain produced by your labor.
3. Because co-operation eliminates unnecessary middle-men and dividend hunting shareholders, who take a heavy toll of the wealth produced by the farm workers.
4. Because the co-operative principle of "each for all, and all for each" is the workers' ideal which alone can bring economic and social justice, peace and prosperity, to all throughout the world.
5. Because the farm workers ought to concentrate their resources in co-operation instead of supporting capitalistic organizations hostile to co-operative movements.

SIGN A WHEAT POOL CONTRACT

Further active steps have been taken during the past week by the Department of Agriculture to check the activities of salaried men representing the Central United States Swine Company who have been taking orders for Chester White Sows and boars in various sections of the Province. Officials of the Department have been busy in a number of districts advising farmers to have nothing to do with the contract offered them by these salesmen. The proposition which at first sight appears attractive proves on investigation to be very unsound from the stand point of the farmer and information secured by the Department shows that farmers in a number of sections of the United States suffered heavy losses by becoming involved in similar schemes. The Bankers' Association has emphasized the warning being issued by the Department by advising local bank managers throughout the Province of the unsoundness of this scheme.
